SUMMARY

Computer Engineering Graduate targeting GenAI Developer and Full Stack Developer roles, with hands-on experience building agentic AI systems, RAG workflows, and full-stack applications. Proficient in full-stack development, backend systems, API integrations, and database management.

EDUCATION

Bachelor of Technology in Computer Engineering <i>New LJ Institute of Engineering and Technology, Ahmedabad</i>	2026 CGPA: 8.26/10
Diploma in Computer Engineering <i>Government Polytechnic, Gandhinagar</i>	2020 CGPA: 9.24/10

EXPERIENCE

Data Analytics Intern <i>CSRBOX</i>	July 2025–Aug 2025 <i>Remote</i>
---	-------------------------------------

- Analyzed real-world organizational datasets using Tableau to extract actionable insights supporting datadriven decision-making.
- Performed data cleaning, preprocessing, and transformation on large datasets ensuring data quality and consistency for stakeholder reporting.

Full Stack Developer Intern <i>Orvix Technologies — React.js - Node.js</i>	Jan 2026–June 2026 <i>Remote</i>
--	-------------------------------------

- Built a full-stack financial analytics platform (FinSights) using React, TailwindCSS, and Node.js/Express, converting bank statement PDFs into structured insights via Gemini API.
- Designed and integrated RESTful APIs connecting the React frontend with the Node.js backend for seamless data flow.

Full Stack Developer Intern <i>Continuum Digital — Python - Odoo - AI Automation</i>	July 2026–Present <i>Onsite</i>
--	------------------------------------

- Developed a Python based lead generation pipeline that scrapes business contacts and decision-maker info.
- Developing custom Odoo ERP modules to automate internal business workflows.

PROJECTS

Agentic-Chatbot-Invoice-Dispatcher Live Demo	<i>Python LangChain LangGraph Streamlit</i>
---	---

- Architected an autonomous chatbot system to extract invoice data using Tesseract OCR and dispatch business invoices, reducing processing time by 60%.
- Integrated SMTP-based email dispatch system to fully automate invoice delivery directly to clients.
- Developed a LangGraph agent pipeline to efficiently handle dynamic intent routing and tool orchestration.

Expense Tracker (Local MCP Server)	<i>FastMCP, SQLite, Python</i>
---	--------------------------------

- Built a local expense tracker exposed as an MCP server for LLM client tools.
- Implemented MCP tools for CRUD operations and date-range expense summarization using SQLite.
- Designed tool schemas enabling accurate data retrieval and filtering by category.

FinSights – Bank Statement Analyzer	<i>ReactJS Node.js Express.js Gemini AI D3.js MongoDB</i>
--	---

- Built a full-stack financial analytics platform converting bank statement PDFs into structured insights via Gemini AI API.
- Developed interactive D3.js visualizations including spending treemaps, burn-rate gauges, top-merchant charts.
- Reduced manual statement review time by 70% by automating category tagging via LLM prompts.

TECHNICAL SKILLS

Programming Languages: C/C++, Java, Python

Frameworks & Libraries: Node.js, Express.js, FastAPI, ReactJS, LangChain, LangGraph, LangSmith, PyTorch, RESTful APIs, Socket.io, Streamlit

AI/LLM Tools: Prompt Engineering, Gemini API, ChatGPT API, Claude API

Databases & Vector Databases: MongoDB, MySQL, PostgreSQL, ChromaDB, FAISS

Web Technologies: JavaScript, TailwindCSS, HTML, CSS, EJS

Tools & Visualization: n8n, Git, GitHub, Postman, Docker, Tableau, Pandas, NumPy, D3.js

CERTIFICATIONS

- **Agentic AI Foundations Associate — Oracle (2026)**
- **AWS Cloud Practitioner — Amazon Web Services (2021)**
- **Python Basics for Data Science — edX(2021)**
